Free kits are available to those who pre-register. Supplies are limited.

## What is Narcan<sup>®</sup>?

Narcan<sup>®</sup> is a drug that reverses the effects of a heroin or opioid overdose.

## Why does this matter?

Nassau county and the surrounding communities continue to battle a heroin and opiate epidemic that has taken many of our loved ones. Narcan<sup>®</sup> has already saved hundreds of lives.

## How can you help?

Come to this training session, which is open to anyone aged 18 and over. You will be trained to react to an overdose and administer the antidote that can save a life.

Research has shown that with basic training, non medical professionals such as friends, family members, or even concerned bystanders can administer Narcan<sup>®</sup> and save a life.
